## Level 1 /2 Hospitality and Catering: PERSONALISED LEARNING CHECKLIST

NG2A	Red	Amber	Green	Revised Tick ☑
Area of Study: Commodities Cereals				
I know the value of cereals in the diet? I can name the main nutrients				
I understand and know how to store cereals correctly to avoid food contamination	- m			
I understand and know how to use cereals	RJ3			
I know where cereals come from and how they are processed				
I can cook dishes using cereals			2	
I understand and know what occurs when heat is transferred to cereals			E.	
I understand and know what different chemical reactions cereals have as a result of given actions		Second Contraction	2 C	3
I can classify cereals			Sec.	N
I can demonstrate how to use cereals		3 7	2 3	4
Area of Study: Commodities Cheese				
I know the value of cheese in the diet? I can name the main nutrients				$\rangle$
I understand and know how to store cheese correctly to avoid food contamination			5	
I understand and know how to use correct techniques to use cheese safely		E		
I know where cheese comes from and how it is processed	$\mathbf{>}$		1.7	
I can cook both sweet and savoury dishes using cheese	//	AN AN		
I understand and know what occurs when heat is transferred to cheese	EI			

I understand and know what different chemical reactions
cheese has as a result of given actions
I can classify cheese
I can demonstrate how to cut and prepare cheese
Area of Study: Commodities Eggs
I know the value of Eggs in the diet? I can name the main
nutrients
I understand and know how to store eggs correctly to avoid food contamination
I understand and know how to use correct techniques to
prepare eggs safely
I know where eggs come from and how they are
processed
I can cook dishes using eggs
I understand and know what occurs when heat is
transferred to eggs
I understand and know what different chemicals
reactions eggs have as a result of given actions (fresh, dried, pickled)
I understand and know how to beat, whisk, bind, coat,
set, glaze, with eggs
I can demonstrate how to beat, whisk, bind, coat, set,
glaze, with eggs
Area of Study: Commodities Fish
I know the value of Fish in the diet? I can name the main
nutrients.
I understand and know how to store fish correctly to avoid food contamination
I understand and know how to use correct techniques to
prepare fish safely
I know where fish comes from and how it is processed

I can cook dishes using fish	
I understand and know what occurs when heat is transferred to fish	
I understand and know what different chemical reactions fish has as a result of given actions (fresh, frozen, dried, smoked, canned)	
I understand and know how to fillet a fish	
I can demonstrate how to fillet a fish	
Area of Study: Commodities Fruit	
I know the value of Fruit in the diet? I can name the main nutrients	
I understand and know how to store fruit correctly to avoid food contamination	
I understand and know how to use correct techniques to prepare fruit safely	
I know where fruit comes from and how it is processed	
I can cook sweet and savoury dishes with fruit	1
I understand and know what occurs when heat is transferred to fruit	
I understand and know what different chemical reactions fruit has as a result of given actions (fresh, frozen, dried canned)	
I can classify fruit	
I can demonstrate how to use fruit in different ways	
Area of Study: Commodities meat	
I know the value of Meat in the diet? I can name the main nutrients.	
I understand and know how to store meat correctly to avoid food contamination	
I understand and know how to use correct techniques to prepare meat safely	

I know where meat comes from and how it is processed
I can cook dishes using meat
I understand and know what occurs when heat is
transferred to meat
I understand and know what different chemical reactions
meat has as a result of given actions (fresh, frozen, dried,
smoked, canned)
I understand and know how to portion a chicken
I can demonstrate how to portion a chicken
Area of Study: Commodities milk and dairy
I know the value of Milk and Dairy in the diet? I can name the
main nutrients
I understand and know how to store milk and dairy products
correctly to avoid food contamination
I understand and know how to use correct techniques to
prepare milk and dairy products safely
I know where Milk comes from and how it is processed
into dairy products
I can cook sweet and savoury dishes using milk and dairy products
I understand and know what occurs when heat is
transferred to milk and dairy products
I understand and know what the different chemical
reactions milk and dairy products have as a result of
given actions (fresh, frozen, dried, canned, heat
treatments)
I can classify milk and dairy products
I can demonstrate how to use milk and dairy products
Area of Study: Commodities vegetables
I know the value of vegetables in the diet? I can name the main
nutrients

I understand and know how to store vegetables correctly to avoid food contamination	
I understand and know how to use correct techniques to	
prepare vegetables safely	
I know where vegetables come from and how they are	
processed 81	
I can cook sweet and savoury dishes using vegetables	
I understand and know what occurs when heat is	
transferred to vegetables	
I understand and know what different chemical reactions	
vegetables have as a result of given actions (fresh,	
frozen, dried, canned)	
I can classify vegetables	
I can demonstrate how to prepare vegetables	
I am most confident with the following topic/topics:	
	$\geq$
I have struggled most with the following topic/topics:	
	<b>rised</b> k ⊠
Area of Study: Cooking and Food Preparation - Batters	
I can identify the basic ingredients used in making a Batter	
I understand, know and can explain what a Batter is	
I can list dishes made from Batters	
I can list Three types of Batter	
I can demonstrate how to make a Thin Batter	
I can demonstrate how to make a Thin Batter I can demonstrate how to make a Thick Batter	

Area of Study: Cooking and Food Preparation -	Biscuits	5		
I can identify the basic ingredients used in making Biscuits				
I understand, know and can explain what Biscuits are				
I can list Four different cake making methods used to make Biscuits				
I can list different types of Biscuits made using the Rubbing In method, Creaming Method, Whisking Method and Melting Method	<u>M</u>			
I can demonstrate how to make Biscuits using the Rubbing in Method				
I can demonstrate how to make Biscuits using the Creaming Method	Q		5	
I can demonstrate how to make Biscuits using the Whisking Method			E-	
I can demonstrate how to make Biscuits using the Melting Method	R	Second Contract		2
Area of Study: Cooking and Food Preparation -	Cake M	aking		
I can identify the basic ingredients used in Cake Making	Second		100	
	855 3	3 3		A.
I can name the Five basic Cake Making Methods				4
I can name the Five basic Cake Making Methods I can give examples of the Five basic Cake Making Methods				4
I can give examples of the Five basic Cake Making				
I can give examples of the Five basic Cake Making Methods I can demonstrate each of the Five Cake Making				
I can give examples of the Five basic Cake Making Methods I can demonstrate each of the Five Cake Making Methods I can demonstrate batch production using all of the Five				
I can give examples of the Five basic Cake Making Methods I can demonstrate each of the Five Cake Making Methods I can demonstrate batch production using all of the Five Cake Making Methods				
I can give examples of the Five basic Cake Making Methods I can demonstrate each of the Five Cake Making Methods I can demonstrate batch production using all of the Five Cake Making Methods I understand, know and can explain caramelisation	Develop	ping rec	ipes and	food

I can demonstrate how to adapt recipes to address current dietary advice I can demonstrate how to adapt recipes due to lifestyle patterns e.g. working parents who need dishes that are quick to prepare and cook
I can demonstrate how to adapt recipes due to lifestyle patterns e.g. working parents who need dishes that are
patterns e.g. working parents who need dishes that are
quick to prepare and cook
I can demonstrate that I can consider nutritional needs
and food choices when selecting recipes, making
decisions about ingredients, processes, cooking
methods, portion sizes etc.
I can demonstrate the ability to review and make
improvements to recipes by amending them to include
the most appropriate ingredients, processes, cooking
methods and portion sizes e.g. low calorie diets
I can demonstrate how to manage my time, costs of the
recipes effectively
I can demonstrate how to use my sensory evaluation
skills and adjust where needed to improve the recipe
during the preparation and cooking processes e.g.
adjusting seasoning
I can demonstrate how to present my ideas about my
recipes and cooking methods to others. I can justify my
reasons
I can demonstrate I can make decisions about which
techniques are appropriate in order to achieve my
intended outcome, e.g. steaming instead of boiling
I can demonstrated and carried out techniques safely
and have been able to combine them to produce
appealing meals whilst evaluating the end results
Area of Study: Cooking and Food Preparation - Pastry Making
I can identify the basic ingredients used in Pastry Making
I can list Six different Types of Pastry
I understand and know the basic rules of Pastry Making

I understand, know and can explain how to make Short-	
crust Pastry	
I can demonstrate how to make Short-crust Pastry	
I understand, know and can explain how to make Suet	
Pastry	
I can demonstrate how to make Suet Pastry	
I understand, know and can explain how to make Flaky	m
Pastry	
I can demonstrate how to make Flaky Pastry	
I understand, know and can explain how to make Puff	
Pastry	
I can demonstrate how to make Puff Pastry	
I understand, know and can explain how to make Rough	
Puff Pastry	A AND AND AND AND AND AND AND AND AND AN
I can demonstrate how to make Rough Puff Pastry	
I understand, know and can explain how to make Choux	
Pastry	
I can demonstrate how to make Choux Pastry	
I understand, know and can explain how to Laminate	
Pastry	
I can demonstrate how to Laminate Pastry	202 201
I can suggest suitable dishes to make from each pastry	
type	
Area of Study: Cooking and Food Preparation -	Preparation and cooking
techniques	
I can demonstrate how to plan and cook a single dish	
I can demonstrate how to plan and cook a number of dishes in	
one session	
I understand, know and can explain how to 'Dovetail'	E
I can demonstrate how to weigh and measure liquids and solids	

I can demonstrate the 'Claw Grip' and 'Bridge Hold'	
techniques	
I can demonstrate knife skills to prepare foods to	
different shapes and sizes	
I can demonstrate how to tenderize and how to a	
marinate	
I can demonstrate how to cook using the oven, hob and	
grill	ED
I can demonstrate how to adjust cooking times and	8
temperatures	
I can demonstrate how to judge and manipulate sensory	
properties e.g. seasoning, (adding salt pepper etc.)	
I can demonstrate how to test for readiness	ing Dy Roa
I can demonstrate how to finish dishes by; shaping and	
finishing a dough or pastry, glazing, food styling,	
preparing fruits and vegetables as a garnish	
I can demonstrate selecting appropriate preparation	
cooking and serving techniques when making different dishes	
I can demonstrate how to work independently	
I can demonstrate personal and food safety, hygiene	
practices and procedures when preparing and cooking	
foods	
I can demonstrate how to use sensory descriptors	
appropriately and correctly when describing food/dishes	KA LEV
Area of Study: Cooking and Food Preparation -	Sauces
I can identify the basic ingredients used in Sauces	
I can list Four different types of sauces	
I understand, know and can explain how to make a Roux	
Based Sauce	E
I can demonstrate how to make a Roux Based Sauce	

I understand, know and can explain how to make a
Blended Sauce
I can demonstrate how to make a Blended Sauce
I understand, know and can explain how to make
Reduction Sauces
I can demonstrate how to make Reduction Sauces
I understand, know and can explain how to make
emulsions
I can demonstrate how to make Emulsions
I can suggest suitable dishes to serve each Sauce type
with
I understand, know and can explain Gelatinization with in
sauce making
Area of Study: Cooking and Food Preparation - Sensory evaluation
I can list the Five senses
I can list the Five senses I understand, know and can identify the taste buds on the tongue (bitter, sweet, sour, salty, umami)
I understand, know and can identify the taste buds on the tongue
I understand, know and can identify the taste buds on the tongue (bitter, sweet, sour, salty, umami) I know what the Olfactory System is and how it works
I understand, know and can identify the taste buds on the tongue (bitter, sweet, sour, salty, umami)       Image: Constraint of the taste buds on the tongue of taste buds on the tongue of taste buds on the taste buds on ta
I understand, know and can identify the taste buds on the tongue (bitter, sweet, sour, salty, umami) I know what the Olfactory System is and how it works
I understand, know and can identify the taste buds on the tongue (bitter, sweet, sour, salty, umami)       Image: Constraint of the taste buds on the tongue (bitter, sweet, sour, salty, umami)         I know what the Olfactory System is and how it works       Image: Constraint of the taste buds on the tongue (bitter, sweet, sour, salty, umami)         I understand, know and can explain what sensory analysis is       Image: Constraint of the taste buds on the tongue (bitter, sweet, sour, salty, umami)
I understand, know and can identify the taste buds on the tongue (bitter, sweet, sour, salty, umami)       Image: Constraint of the taste buds on the tongue (bitter, sweet, sour, salty, umami)         I know what the Olfactory System is and how it works       Image: Constraint of the taste buds on the tongue (bitter, sweet, sour, salty, umami)         I understand, know and can explain what sensory analysis is       Image: Constraint of the taste buds on the tongue (bitter, sweet, sour, salty, umami)         I understand, know and can explain how sensory analysis       Image: Constraint of taste buds on the tongue (bitter, sweet, sour, salty, umami)

I understand, know and can explain the effects of deficiency or excess of minerals in the body       I where amount of vitamins needed every day for the different life stages         I know the amount of vitamins needed every day for the different life stages       I where minerals in their element form         I can write minerals in their element form       I where and can explain what dietary fibre is         I understand, know and can explain what dietary fibre is       I where an explain the functions of fibre         I understand, know and can explain the functions of fibre in the diet       I where an explain the sources of fibre in the diet
deficiency or excess of minerals in the bodyImage: Constraint of the bodyImage: Constraint of the bodyI know the amount of vitamins needed every day for the different life stagesImage: Constraint of the bodyImage: Constraint of the bodyI can write minerals in their element formImage: Constraint of the bodyImage: Constraint of the bodyImage: Constraint of the bodyI understand, know and can explain what dietary fibre isImage: Constraint of the bodyImage: Constraint of the bodyImage: Constraint of the bodyI understand, know and can explain the functions of fibreImage: Constraint of the bodyImage: Constraint of the bodyImage: Constraint of the bodyI understand, know and can explain the sources of fibreImage: Constraint of the bodyImage: Constraint of the bodyImage: Constraint of the bodyI understand, know and can explain the sources of fibreImage: Constraint of the bodyImage: Constraint of the bodyImage: Constraint of the bodyI understand, know and can explain the sources of fibreImage: Constraint of the bodyImage: Constraint of the bodyImage: Constraint of the bodyI understand, know and can explain the sources of fibreImage: Constraint of the bodyImage: Constraint of the bodyImage: Constraint of the bodyI understand, know and can explain the sources of fibreImage: Constraint of the bodyImage: Constraint of the bodyImage: Constraint of the bodyI understand, know and can explain the sources of fibreImage: Constraint of the bodyImage: Constraint of the bodyImage: Constraint of the bodyI understand, know and can explaint the sources o
I know the amount of vitamins needed every day for the different life stages       I can write minerals in their element form       I can write minerals in their element form       I can write minerals in their element form       I can classify fibre       I can classify fibre<
different life stagesImage: Constraint of the image: Constraint of the
I can write minerals in their element form       I can verify in their element form         I understand, know and can explain what dietary fibre is       I can classify fibre         I can classify fibre       I can classify fibre         I understand, know and can explain the functions of fibre       I can classify fibre         I understand, know and can explain the sources of fibre       I can classify fibre
I understand, know and can explain what dietary fibre is I can classify fibre I understand, know and can explain the functions of fibre I understand, know and can explain the sources of fibre in the diet
I can classify fibre     I can classify fibre       I understand, know and can explain the functions of fibre     I understand, know and can explain the sources of fibre       I understand, know and can explain the sources of fibre     I understand, know and can explain the sources of fibre
I understand, know and can explain the functions of fibre I understand, know and can explain the sources of fibre in the diet
I understand, know and can explain the sources of fibre in the diet
in the diet
Lundorstand know and can evolate the effects of
deficiency or excess of fibre in the diet
I know the amount of fibre needed every day for the
different life stages
I understand, know and can explain what water is

PERSONALISED LEARNING CHECKLISTS

I understand the ways of prevention and control
methods for enzyme action, mould growth and yeast
production
<u>D(O 5M<sup>2</sup>)</u>
I understand and know the role of temperature, pH,
moisture and time in the control of bacteria
I understand, know and can explain Cross – 🔀 🌔
contamination giving examples
I understand, know and can explain what HACCP is
I can list the Six methods of preservation
I understand, know and can give examples of each
method of preservation
I understand, know and can explain what packaging is and
why it is used
I can list Six different types of food packaging
I can give the advantages and disadvantages of each type
of packaging
I can explain what Modified Atmosphere Packaging is
I understand, know and can explain the difference
between 'Use by dates' and 'Best Before dates'.
I understand and know the importance of date-marks,
and I know how to read the labelling on food products
I understand, know and can explain how to dispose of
packaging in an environmentally friendly way
I understand the consequences of mishandling of food
wastage, including the effect on the environment and
the financial implications on waste.
Area of Study: The Science of Food – Heat Transfer
I understand, know and can explain why food needs to
be cooked

I understand, know and can explain how heat is	
transferred to food	
13	
I can explain conduction, convection, radiation and	
radiant heat giving examples of each	
I understand that some dishes made rely on more than	
one method of heat transfer 🛛 👌 👌	
8/	
I understand, know and can explain Dry, Frying and	
Moist heat methods of cooking	
	XIII
I can list Four Dry heat methods of cooking	
I can list Three Frying heat methods of cooking	
rear list three trying heat methods of cooking	3 - 1
I can list Nine Moist heat methods of cooking	
I understand, know and can explain microwave energy	
cooking	VALCE TAKE
I understand, know and can explain the effects of heat	
on Protein foods, denature, coagulation, foam	
formation, gluten formation, denaturing and the	
Maillard reaction	
I understand, know and can explain the effects of heat	Establish Car
on Fatty foods	
I understand, know and can explain the effects of heat	
on Carbohydrate food, I can name Three and explain	
gelatinization, dextrinization and caramelisation	
I understand, know and can explain the effects of heat	
on Vitamins and Minerals in food enzymic browning and	
oxidation	
VALY /	
I understand, know and can explain what happens to	
water	Y
I understand, know and can explain the effects of	
changing the pH of food	
I understand, know and can explain the effects of oxygen	
on food, Fruit and Vegetables, Meat, Poultry and Fish	
and Fats and Oils	

I understand, know and can explain the effects of		
enzymes on food		
I understand, know and can explain the use of		
microorganisms in food production		
Area of Study: The Science of Food – Raising Age	nts	
I understand, know and can explain what raising agents		
are and why they are used in baking		
I can list different types of raising agents		
I understand, know and can explain Mechanical raising		
agents (sieving, whisking, rubbing in, creaming and		
lamination)		
I understand, know and can explain Physical raising		
agents	State Day	
I understand, know and can explain Chemical raising	A	
agents (bicarbonate of soda, baking powder, self-raising	1 St. 22	
flour, cream of tartar)	and a start	5
I understand, know and can explain Biological raising		N
agent (Natural Yeast and Dried Yeast, sourdough and		$\sim$
gluten)		12
I understand, know and can explain what Emulsions are		
I understand, know and can explain what Foams are		E Contraction
I understand, know and can explain how Flour, Fat, Eggs,	51	X
Sugar, Baking Powder and Yeast work		2
I understand, know and can explain the importance of		<u> </u>
Measuring ingredients accurately		
I can list common faults due to inaccurate measuring of		
ingredients		
I understand, know and can explain the importance of		
accurate Heat Control		
I can list common baking/cooking mistakes and say how	Fil	
to rectify them
