## SUPER CURRICULAR

What ways can you invest in  
your subject area outside of the  
curriculum? Check out this  
weeks suggestions:

- Subject related podcasts – some suggestions on our Mental Health Hub
- Read 1 News article that links to your subject

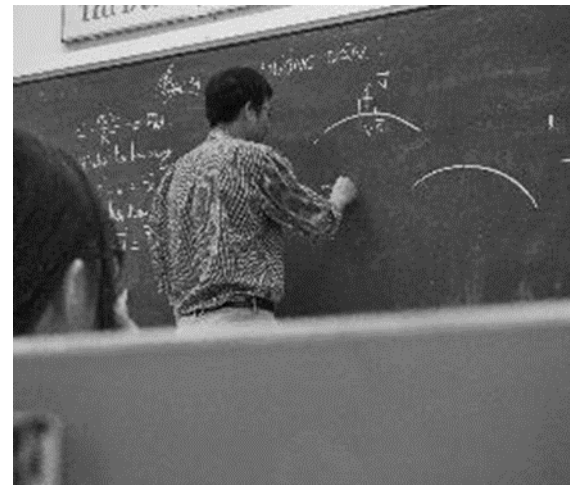

# CAREER SPOTLIGHT

## Medical Careers

Ok, so you hear medicine and immediately think; this means I will be a Dr or a Nurse. For some students that is the right pathway, however quite often there are aspects of medical careers that students are drawn to but the former mentioned careers may not be right for you. Did you know there are over 350 different careers in the NHS alone! It is clear therefore, there are a number of careers in the medical field that fall outside of those painted lines. We have listed just a few to consider and these really are just the tip of the iceberg. It is important to consider which aspects of the medical industry you are interested in. For example, do you want a job that involves shift work and interacting with people from all backgrounds? Do you enjoy the theory aspects related to biology and chemistry within the human body and like to solve problems? When choosing a career here remember some of these are vocations and require additional years of training and working in a variety of fields before specialising. Grades are another factor which you should consider, for example those

- Psychologist**
- Care worker**
- Health Visitor**
- Dietitian**
- Pathologist**
- Pharmachologist**
- Phlebotomist**

- Health Visitor**
- Midwife**
- Dental Hygienist**
- Osteopath**
- Psychiatrist**
- Radiologist**
- Lab technician**

who do decide to study medicine or dentistry should know their GCSE grades will be screwtensied and factored into a decision by the University when making an offer. As always, we rercommedn you do your research and reading around what a day in these jobs really look like. Although the pandemic limits some work experience opportunities there are plenty of ways to delve into these careers virtually. Check out the links and suggestions below to consider what else is out there and where your future in medical careers might be.
